

**Having trouble with your knees, back or hip?  
Is your family member elderly or weak?  
Do you want to live at home for longer?**

Design by  
TAPIO ANTILA

*More  
healthy  
and active  
years  
at home!*

## **NEW Armi Design Activechair**

- A comfortable senior chair that helps you stand up
- Rehabilitates by improving muscle tone
- Improves balance and decreases the risk of falling
- Ergonomically designed and offers good support for the lumbar region
- A safe, reliable and durable Finnish innovation
- Eases the life of an elderly, sick or weak person
- Aids and lightens the work of the carer
- Adjusted to suit you and fitted with upholstery of your choice
- Armi may help you if you have, for example, osteoarthritis, rheumatoid arthritis, diabetes or Parkinson's disease

*"Because of osteoarthritis, standing up hurt my knees and back.  
Standing up from Armi is nearly painless,  
and I do exercises with it daily now.  
Thanks to Armi, I can still live  
independently in my own home."*

# Traditional Armi Classic Activechair

- Armi helps when standing up and rehabilitates
- Makes you feel better when you have trouble with your back, hip or knees
- Improves muscle tone and balance

//

*The chair clearly contributed to him managing at home and retaining his physical fitness."*

*"We bought an Activechair as a gift for our grandmother. And oh, how happy she is about it!"*

*"Grandpa likes to sit in his chair and is able to stand up from it nicely."*

*"I have been taking care of a frail family member for a long time. With the help of Armi, standing up from the chair and rehabilitation is easier."*

## Armi is helpful in nursing homes

- Armi Activechair is an excellent senior chair for nursing homes, homes for the elderly or public spaces.
- Activechair aids the work of a carer and also frees nursing staff for other tasks.
- It helps when standing up and improves muscle tone, so that balance is improved and the risk of falling decreases.
- Armi may help with conditions such as knee, hip or back pain, arthritis, rheumatoid arthritis, general weakness, diabetes, multiple sclerosis, Parkinson's disease, and incontinence.
- Ready-to-use rehabilitation programmes have also been developed for Armi and can be used by physiotherapists rehabilitating their clients.
- Armi Activechairs designed for nursing homes and public spaces are delivered fitted with a medical fabric, which is wear-resistant, dirt-repellent, liquid-impermeable, and safe in case of fire.
- Armi is a medical device that bears a CE mark.
